

Meeting with Ian Ross Parks Officer, Pauline McCormack and Committee of Friends of Bishops Park – 8<sup>th</sup> April 2019

1. Friends would like a plan of how the compound will be set-up - offices, etc. along with confirmation for what it will be used for
2. Friends would like confirmation that the compound will not be used for Fulham FC offices and/or hospitality
3. Council to be clear on tree sizes - X standard trees and X semi-mature standard trees (perhaps use a drawing comparing to an average size person to give a visual idea)
4. Friends would like to ideally re-establish a screen of stand as started a couple of years ago
5. Friends would like confirmation of what the turnstile/Riverside walk area will look like on completion – hopefully an artists impression is available
6. Buckingham's offer to install an additional access gate into the park from Stevenage Road. Ian to seek inclusion in the lease but exact location will need further discussion to avoid conflict with site entrance and vehicles
7. Friends (and many others) would like to confirmation of Council for how any income coming into the Council is actually spent within the park. Ian explained this will be scrutinised by The Church Commissioners. Ian to think how this can be made wholly transparent without the need for regular Freedom of Information requests
8. We discussed a possible project between Council, FFC and Friends to improve 'boundary' between ground and park
9. Friends would like confirmation from FFC that materials delivered along the river will come directly into the site and not to Putney and then delivered by road (the Council's FAQs may be causing confusion – Ian apologised as he wrote these!). Confirmation also requested over proportion of materials that will come by river and by road
10. Friends would like confirmation of road cleaning - times, frequency, etc., numbers of vehicle deliveries per day and what parking suspensions will be in place
