

# BISHOP'S PARK

friends of

14 July 2019

## Fielder's Meadow

### Co Chair Update

The Church Commissioners have signed off on the lease for the park. The contractors have started work in the park. The summary document S123, will be on the website shortly. outlines and lists all the concerns and questions that we and others have asked. We understand the concern that everyone has about protection of the trees, planning creep and reinstatement of the park after works have been completed and to this end the Friends have had numerous meetings with Fulham Football Club and the council officers dealing with the development to ensure that the needs of the parks users and the park its self will have had representation. When we have more detailed information we will inform you by email and post it on the website.

---

### SPACEHIVE

### ROSE GARDEN

### CROWD FUNDING UPDATE

43 people have pledged **£4651** towards our total of **£3,945**

We are **119%** funded!

Hope to see you then

#### AGM

**16th October at the Palace Gardener**

Time: TBC

---

## NATURE NOTES FROM BISHOP'S PARK

from Jane Swithinbank

On 16th May a friend and I observed eight bird species in twenty minutes in the boundary wall bed beside Fielder's Meadow - pair of chaffinches, wren, robin, great tit, male blackbird, goldfinches, blue tit and wood-pigeon in spite of the bird scarers! On Good Friday we saw wrens, great tits and blackbirds nesting. As this excellent habitat will be lost it would be great if our members of Friends of Bishop's Park would keep an eye out for other habitats in the park which are good spots for bird-watching and observing other wildlife.

I hope everyone saw the wonderful blooms on the pyracantha
